

I rely on my XM for traffice because I have to travel a lot for my job. XM allows me to get up to the minute information for the area I am going to so that I can judge for myself which route to take. It is crazy that someone else can dictate to me since I am the one paying for the sattelite radio, not them. DO NOT LET THIS HAPPEN!! Make the others step up to the plate and perform if they are that worried.
